Lisboa, Rua D. Jerónimo Osório, n.º 11, 1st Floor [Google map](#)

Offer & Request

Marine Environment Research; Environmental Impact Assessment; Ecosystem Services

Research on environmental impacts occurring during the different stages of marine renewable energy projects, e.g. effects on benthic communities, underwater noise, biofouling growth and impacts on marine mammals caused by marine renewable energy and offshore wind devices, etc.

Particularly interested in the potential benefits of MRE deployments on the enhancement of primary productivity and therefore its potential artificial reef effects.

Cooperation Offered

1. Commercial cooperation
2. Technical cooperation

3. R&D Cooperation

4. Other
